

Update your devices in the field (OS and application) ?

Eliminate any potential risks, such as update package tampering and cyber attacks ?

Reduce the amount of data transfer for each update ?

Select the right infrastructure or SaaS tailored specifically to your need ?

# WiUpdate – Software update

## OUR SOLUTION

- Define the **requirements of your system** together (in terms of scalability, infrastructure, security, uptime...)
- Presentation of the different **solutions available** (open source and commercial)

## OUR 3 STEPS EXPERT APPROACH

### 1- Initial workshop

Assess the existing architecture of your product

### 2- Add Witekio's expertise

Find out the best architecture and tools that match the requirements and are strong enough without being overkill.

Compare the most relevant approaches .

### 3- Final workshop

Provide full visibility and clarifications on the outcome, and start forecasting next steps

## YOUR OUTCOME

- Embedded Software Architecture document - 1
- Infrastructure and tools recommendations document - 2
- Macro planning and project sizing - 3

## YOUR BENEFITS

- Full understanding on how to **update your devices in the field** •
- Secured project** timing, technologies, and costs •

# Leverage an experienced team to tailor the best update solution for your products

15

years experience in embedded and IoT software design, architecture, development and integration

90+ engineers

Coders, challengers, designers, developers, architects focused on our customers, happy to bend over backwards for them.

300

Projects/year, in a very broad range of technologies (embedded firmware and application, OS, mobile application, Cloud systems)

## Some of our customer projects

02  
FACIAL  
SCAN

**LA FINE DE**  
Le visage est le reflet de la beauté. Mais il est aussi le reflet de la santé. C'est pourquoi, nous avons développé une technologie de scan facial qui permet de détecter les problèmes de peau et de proposer des solutions personnalisées.

**LE CHIFFRE**  
Nous avons développé une technologie de scan facial qui permet de détecter les problèmes de peau et de proposer des solutions personnalisées.

**LE MOBILE**  
Le scan facial est une technologie qui permet de détecter les problèmes de peau et de proposer des solutions personnalisées.

**LE BESOIN**  
Nous avons développé une technologie de scan facial qui permet de détecter les problèmes de peau et de proposer des solutions personnalisées.

**L'Oréal**

Connected skin scanner & foundation maker

**Smoove**

Connected self service bikes

**Enedis**

LINKY - Connected electricity meter
